Cable Cutters-Strippers

Cable cutters and strippers are built to cleanly cut or strip wire and cable without damaging the insulation or the internal conductors. One-hand action cable cutters make cutting wires and cables to the right length a simple task. Ratcheting cable cutters make short work of even the toughest of the larger gauge cables. When it comes to stripping a wire or cable, efficiently removing the outer jacket while protecting the internal conductors is an essential factor to consider. All the tools you see here have been rigorously tested and approved by our internal team of experts.
