

# ***Pacer*** Group

## ***Courtesy Lights***

Courtesy lighting refers to marine LED lighting that is designed to help create a safer environment. That is to say that courtesy lighting is built to illuminate dark areas in stairways, doorways, areas with low hanging ceilings and more. In this way, the newly brightened areas become easier to navigate which, in turn, reduces the chances of slips, trips, falls, or other accidents that can occur in poorly lit areas. Courtesy lighting is known for its ease of installation and bright levels of illumination.

## ***Marine Tough***

All Pacer Group LED lights are built with the harsh marine environment in mind

## ***Available Finishes***

→	<b>PS</b>	Polished Stainless

Multiple finishes and bulb color options mean that you get the exact part you want

Designed with the marine environment in mind ensures longevity and durability

Easy to install and maintain make these the ideal choice for boaters of all kinds

Replacement covers and fixtures make repair a simple task for even amateur boaters

Courtesy lighting can be used in a variety of settings, especially settings where safety is a primary concern. These lights are used in areas that are more prone to accidents due to the poor lighting conditions found there. The high level of illumination that these lights offer makes any location a safer place. You will find these lights in professional and recreational boats alike.
