## Indicator Lights

Indicator lights are a great way of signifying power to equipment or signifying if there is a malfunction. This is why Pacer offers multiple color choices. We offer indicator lights in E3L and E5S series. What is the difference between the series? E3L Series are compact style lights that snap-fit into a 5/16" hole and are secured with a spring clip. As an added bonus, these lights have a built-in resistor. The base and bezel colors of the E3L series are black. E5S Series lights snap fit into a 1/2" hole, and are secured into place with self-locking ears. All E5S lights have a silver plated bezel.

Pacer is a Proud Member of:

## Construction

Incandescent bulb, translucent lexan lens.

## Benefits

- Multiple colors
- Multiple voltages
- Easy to install
- Silver plated bezel
- Compact style

## Available Colors

- Red
- Green
- Blue
- Amber

## E3L SERIES

PART NUMBER	VOLTAGE RATING	MOUNTING METHOD	MOUNTING HOLE SIZE (Inches)	REQUIRED PANEL DEPTH (Inches)	PANEL THICKNESS (Inches)
E3L-14	14	Snap In w/Spring Clip	5/16	1.430	0.030 Min
E3L-28	28	Snap In w/Spring Clip	5/16	1.430	0.030 Min
E3L-125	125	Snap In w/Spring Clip	5/16	1.430	0.030 Min

**FEATURES:** \*3L Series are compact style. Base & bezel colors are black. \*Multiple voltage rating \*6" UL tinned copper lead wires  
\*Available in red, green, amber and blue \*Built-in resistor

**COMPLIANCES:** \*UL Listed

## E5S SERIES

PART NUMBER	VOLTAGE RATING	MOUNTING METHOD	MOUNTING HOLE SIZE (Inches)	REQUIRED PANEL DEPTH (Inches)	PANEL THICKNESS (Inches)
E5S-14	14	Self Locking Ears	1/2	1.090	0.030 to 0.093
E5S-28	28	Self Locking Ears	1/2	1.090	0.030 to 0.093
E5S-125	125	Self Locking Ears	1/2	1.090	0.030 to 0.093

**FEATURES:** \*5S Series lights snap fit into 1/2" hole. Silver plated Bezel. \*Multiple voltage rating \*6" UL tinned copper lead wires  
\*Available in red, green, amber and blue \*Built-in resistor

**COMPLIANCES:** \*UL Listed
