All Pacer Group LED lights are built with the harsh marine environment in mind

## LED Lighting Accessories

LED Lighting accessories are a category of items that enhance the functionality of LED lights or help to beautify them. This category includes things like grommets, beauty rings, DC dimmers, end caps, mounting clips, and more. Lighting accessories can perform a task as simple as creating a watertight seal, or as complex as converting power from alternating current to direct current. All our lighting accessories have been built with the harsh marine environment in mind.
