## Specialty LED Lighting

Specialty lighting is the type of LED lighting equipment that falls outside of the normal categories. So, instead of engine room lights or courtesy lighting, you have specialty LED lights that serve a unique purpose. These include things like tape light, microlights, LED boards, RGB controllers and more. Basically, specialty lighting is designed for very unique purposes that can straddle a wide range of applications.

LED rope light is useful for a variety of applications. Some people run it along with the interior trim where others may wrap portions of the helm. Anyway, you use it, having a dimmable LED rope light is ideal when you want to control your lighting on the spot. Paired with an RGB controller gives you immediate control from anywhere on your vessel.
