Striped Marine Wire

Striped marine wire is primary wire that has been color-coded to make identification of its use easier. How? A stripe, or two, of varying colors is added to the insulation of a wire. You may ask yourself; how can this be useful? Striped marine wire makes the process of identifying a wire's designated purpose much easier. This, in turn, makes maintenance, repair, and replacement of wires and parts much easier as well.

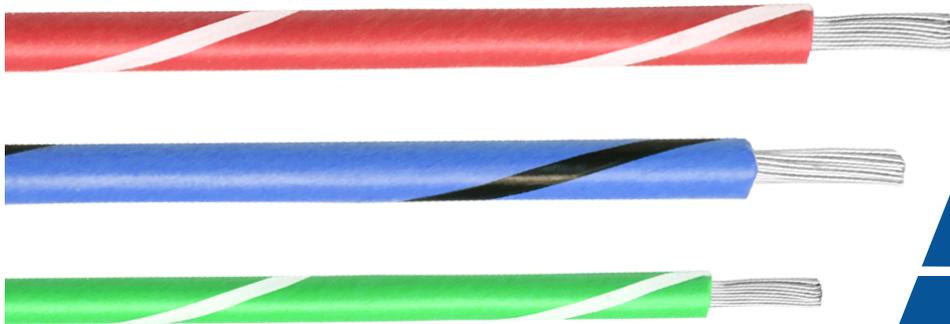

Construction

Type III Class K annealed fine stranded tinned copper

Proprietary insulation ensures high quality protection

Compliances

-  UL Standard 1426 BC-5W2
-  Machine Tool Wire
-  ABYC: E-11.14
-  Coast Guard: 33 CFR part 183
-  AWM 1028/1231 (8 AWG)

Pacer is a Proud Member of:

Resistances

-  Acid Resistant
-  Alkali Resistant
-  Oil Resistant
-  Moisture Resistant
-  Abrasion Resistant
-  Gasoline Resistant
-  Flame Resistant

AWG NO.	CONDUCTOR STRANDING	NOM. INSULATION (IN.)	NOM. O.D. (IN.)	NOM. CIRCULAR MILS	STANDARD PUT-UPS	APPRX LB/M

8	168/0.0100	0.045	0.265	16800	C,TL,D,M	80.0

- ➔ Built for durability, flexibility, and longevity in the harshest marine environments
- ➔ So flexible that you can tie it into a knot without compromising any of its qualities
- ➔ High quality striping simplifies the identification process
- ➔ Ease of installation and the longevity of its design have helped solidify this marine wire as the choice of boating professionals
