Blank Switch Covers

Switch covers for Carling Contura Rocker Switches are available in multiple styles. The switch covers are made of black, white, or red, thermoplastic poly-carbonate and a hard nylon overlay. Blank switch covers are used for a variety of purposes but most often they are used as placeholders for switches that have not been fully installed or are waiting for particular pieces of equipment to be installed. All Pacer blank switch covers fit the Carling Contura Rocker Switches.

With a change-out time of fewer than 10 seconds, Pacer's blank switch covers are the ideal solution for your switch body needs. UV resistant and designed for longevity, these switch covers will not melt or change under direct sun exposure regardless of the amount of time that they spend there. Available in a variety of body colors, body styles, lens colors, and number of lenses, these switch covers are the standard contura size and fit all industry-standard mounts.

Whether searching for a single blank switch cover or enough to handle a line of boats, Pacer has what you are looking for in the styles that you need. Contact a Pacer expert with any questions that you may have.

	<ul style="list-style-type: none"> • EV Series: Symmetrically curved edges. • Standard switch cover body is black • Standard lens color is red 						Black Body 1 White Lens Part Number: EV1WL-BLANK		Black Body 2 White Lens Part Number: EV2WL-BLANK

As one of the most popular styles of Contura switch covers available, the EV series is known for its sleek design and curved edges. Just as with all our switch covers, the EV series fits all industry-standard switch bodies. Additionally, they offer the same high level of protection from UV exposure that you get with other styles of switch covers. The hard thermoplastic polycarbonate bodies are perfect for handling the toughest marine conditions out there.

Regardless of the body style, body-color, or lens color you select, you will get the same top-level protection on all of the switch covers that we carry.
