Wire & Cable Manufacturer

Wrappable Braided Tubing

Wrappable Braided Tubing

offers easy installation and eliminates the need for fasteners. The split in the tube allows it to open up to handle a wide range of bundling requirements. It rolls out easily and the semi-rigid braid configuration wraps around the entire harness. In this way, all of the cables or wires are securely bundled. As an added bonus, it is more flexible than spiral wrap or split conduit. Wrappable braided tubing is specifically designed to protect previously installed wires and hoses making it ideal for use in a variety of applications.

Construction

Designed to be semi-rigid giving it durablity as well as flexibility

Benefits

- Cut Resistant
- Easy to Install
- Field Serviceable
- Built for Longevity
- Abrasion Resistant
- Protects Wires & Hose

Applications

- Commercial Usage
- Residential Usage
- Industrial Usage
- Marine Usage

PART NUMBER	NOM. SIZE (IN)	EXPANSION RANGE Minimum (IN)	Maximum (IN)	STANDARD LENGTH Shop	Bulk	AVAILABLE COLORS	WEIGHT LB/BULK
WRAPPABLE BRAIDED TUBE

Ordering Information: Combine part numbers with color abbreviation and standard length. Colors: BK = Black CW = Clear

F6's unique split, semi-rigid braided construction makes it the ideal solution for situations where ease of installation is paramount. The lateral split allows the tube to open up to accommodate a wide variety of bundling requirements, and the semi-rigid braid configuration simply closes around the entire installation without the need for any additional fasteners. F6 is more flexible than slit conduit or spiral wrap.

APPLICATIONS: *Engine compartment dress-up *Home theater wire management *Computer case wiring *Office wire management *Automotive harnesses

FEATURES: *F6 is specifically designed to protect previously installed wires and hose *Cut & abrasion resistant *Easily cut with hot knife

How is wrappable braided tubing installed?

Installing wrappable braided tubing is as easy as unwrapping the end of the sleeving and tucking the wire bundle inside. Once there, you would start working the sleeving around the rest of the wire until the entire wire run is enclosed.

Wrappable braided tubing has a 25% overlap meaning that it is easy to unwrap while offering a high level of protection. The balance between flexibility and durability makes this type of wire management material the obvious choice for most applications. To make this product even better, wrappable braided tubing is built to be highly flexible in tight spaces.

- More flexible than split conduit or spiral wrap making it ideal for a range of applications
- Retains shape and rigidity through-out -94°F to 257°F temperature range in most environments
- It will bend to a tight radius without distorting or splitting open
- Simple to install and designed with longevity in mind make wrappable braided tubing the obvious choice
- Abrasion and cut resistant making it an ideal choice for tough industrial applications
